Bachelor of Science in Computer Science
University of Ibadan, Nigeria.
Graduated: April 2024

PROFILE

I am a creative frontend engineer committed to precision and accuracy in product delivery. My keen attention to detail and passion for my craft drive me to consistently exceed expectations and deliver exceptional results.

EXPERIENCE

Frontend Engineer,
Legal trunk, Remote,
July 2024 - September 2024
- Led the implementation of a legal platform following best practices for code efficiency, scalability, maintainability and accessibility
– Utilised design and functionality know-how to manage end-to-end web dashboard application development.

Frontend Engineer,
Willis Capital, Remote,
August 2023 - June 2024

– Designed and architected the flow of the frontend application that accommodates thousands of forex traders.
– Developed a sophisticated admin platform that aggregates market insights, charts, and user performance metrics to visualize business data effectively.

Cross Platform Mobile Application Developer,
Paxalpha Limited, Hybrid,
January 2022- April 2023
- Modified existing software to upgrade interfaces, correct errors, adapt to new google play store compliances and improve performance.
– Developed offline capabilities that allow users to access certain features without an internet connection, ensuring uninterrupted access.
